

The mantel customization process

Creating a custom mantel shelf with us is a simple and collaborative process. Want to feel prepared when you come into the store? Here's the process we'll follow:

1

Initial consultation.

First, we'll discuss your goals. Is your mantel for a **new home** or a **remodel**?

2

Surface assessment.

What surface are we installing the mantel on – **drywall, stone, or shiplap**?

3

Installation plan.

How will you be mounting your mantel? We'll guide you in choosing **floating style or traditional brackets**.

4

Size & specifications.

Measure your space, including ceiling height and mantel dimensions. **Use blue painter's tape** to visualize it, take photos from different angles for reference, and **upload here**.

5

Choose your custom mantel.

Based on your responses, we'll help you **select the perfect mantel**. We can cut mantels to size for your convenience.
